Product Description

Product Description:

CNC Stamping Parts are the precision parts manufactured by computer numeric control (CNC) stamping machines. The CNC stamping machines can produce stamped metal parts with high accuracy and repeatability. The CNC stamping parts are widely used in automotive, electrical, electronic, industrial and other fields. Various surface treatments, such as polishing, zinc plating, nickel plating, chrome plating, and anodizing, are available to meet different application requirements. OEM/ODM is acceptable for CNC stamping parts. The material used for CNC stamping parts can be stainless steel, carbon steel, aluminum, copper and brass, among others. Samples are available for customers to evaluate.
